

CEPHEUSTECH
Engineering Winning Solutions

Multidisciplinary Cleantech Solutions Your Key to a winning Green Solution

We provide comprehensive design, engineering, and production services for Solar, passive architecture, waste to energy, gasification and other Clean and Green Energy Projects.

Concurrent Design applies our engineering and design core skills to promote the growth of clean energy products / green energy products. This applies to Product Development as well as Manufacturing Process Development.

Our Expertise includes:

- » Clean Technology Product Development
- » Clean Technology Process Development
- » Clean Technology Manufacturing Solutions
(Tools, Equipment, Automation, Process Development)
- » Application Specific Engineering Solutions for
- » Clean Technology integration
- » Engineering Analysis (Structural & Thermal – FEA, CFD)
for Clean Energy Products
- » Sustainable Design for product development
- » Solar Energy Engineering Services
- » Product Design
- » Test Equipment Design / Build for Solar Energy

Systems or Products including:

- » Solar Products
- » Solar Integrated Products
- » Solar Systems
- » Fuel Cells
- » Passive architecture
