

CEPHEUSTECH
Engineering Winning Solutions

Multidisciplinary Medical Solutions Your Key to a winning product

Cepheus-Tech Ltd specializes in developing products for the medical industry, including disposables, diagnostic products, hand-held instruments, monitoring equipment, point-of-care products, life support, Orthopedics & surgical devices.

Services include analysis, design and development, industrial design, mechanical, thermal, control & electronic engineering, R & D, FDA documentation, model making & prototyping. In house staff can provide everything from the initial conceptual idea through the design, engineering, & prototyping, to the sourcing of vendors & coordination of a smooth hand-off to manufacturing.

We bring wide experience designing medical devices and work methodologies specially suited to the Medical Device industry.

Our main services include:

- » R&D (Mechanics and Electronics)
- » New Product Design
- » Transfer To Production Services
- » Production Tools
- » Production line establishment
- » Consulting & Engineering Services
- » Projects Management and Monitoring
- » Costs Reduction Sourcing
- » OEM Products
- » Turn Key Solutions

Our Engineering Characteristics:

- » Efficient, Professional and Skilled personnel.
- » Speed and Flexibility
- » Rapid learning curve & synergy
- » Strategic approach
- » Rapid ROI
- » Discretion and Reliability
