

CEPHEUSTECH
Engineering Winning Solutions

Multidisciplinary New Product Introduction & Transfer To Production Solutions

Your Key to a winning product

The comprehensive NPI & TTP (New Product Introduction and Transfer to Production) services offered by Cepheus-Tech Ltd. includes: engineering consulting for NPI & TTP as well as project management. We offer an efficient, cost and time oriented controlled process, enables a fast and stable new product launch.

In a world where "time to market" is a key factor to your success – utilizing our engineering abilities can enable you to reach product launch faster whilst maintaining a controlled production environment, high quality standards and low costs.

Our main NPI & TTP services include:

- » Concurrent engineering
- » Production technologies definitions
- » Mechanical & Electronic Design For Manufacturability
- » Product/Production File
- » Production, Assembly & Inspection devices design
- » Prototyping and PILOT series
- » NPRR (New Product Readiness Review)
- » Logistics & Supply Chain definitions
- » Product Release
- » Configuration Control

Production in the Far East

We have two rep. offices in China (Shenzhen and Shanghai) that enables us to work closely and directly with Chinese manufacturers and the Chinese market.

Our China rep. office services include:

- » Production site establishment
- » Tools and Parts manufacturing
- » Sourcing Services
- » Cost Reductions
