

**CEPHEUSTECH**  
Engineering Winning Solutions

## Multidisciplinary Plastics Solutions Your Key to a winning Solution

Our multidisciplinary plastics solutions services range from consulting, analyzing market and manufacturing feasibility, product design and engineering, mold design and production, streamlining operations, sophisticated purchasing services, through to large-scale turnkey projects for leading players in the global plastics arena. We specialize in precision injection molding for the medical, consumer packaging and high-end industrial markets.

### Product Design

From the very first stages of product design, Cepheus-Tech Ltd. expertise comes into play in ensuring the economic feasibility of the product and the efficiency in manufacturing. We design products for our clients in an optimal fashion; we then design the best possible mold to enable the manufacture of a product that will be less costly and far more efficient to produce. We also offer technical consulting and troubleshooting, offering solutions, lowering production costs and more.

### Mold Design

Using the latest technologies, create the mold(s) necessary to produce your part.

### Material Selection

Engineering resources to optimize your part and cost performance.

### Contract Management

Strong relationships with molders both here and abroad

### Assembly Services

- » Sonic Welding
- » Heat Welding
- » Collar Insertion
- » Tampon Stamping
- » General Assembly Services
