

CEPHEUSTECH
Engineering Winning Solutions

Multidisciplinary R&D Solutions Your Key to a winning solution

The multi-disciplinary capabilities of Cepheus-Tech Ltd. covers the entire gamut of engineering disciplines from process design, to mechanical and equipment design, structural engineering, energy and thermal engineering, electrical design and computer aided engineering and turnkey projects.

We are well experienced in meeting the highest standards of design in numerous industrial fields. This is achieved by combining the full range of engineering services with the latest technologies.

Cepheus-Tech Ltd. can provide the ingenuity, expertise and experience needed to get projects off the ground.

Our services are characterized by a Time-To-Market orientation, High Quality standards and Cost Oriented Solutions.

Our main R&D services include:

- » Product Development
- » Tests & Analysis
- » Concepts & Mockups
- » Mechanical Engineering
- » Electronic Engineering
- » Thermal Engineering
- » System Engineering
- » Control
- » Consulting services
- » Reverse Engineering and Documentation

Our filed of expertise:

- » Medical Products
- » Toys and Home Appliance Products
- » Semi-Conductors industry
- » Military
- » Electro-Optics
- » Energy
- » Clean-Tech industry
- » Biotech Industry
- » Industrial Solutions
